

What's GROWING on?

HORT
JOURNAL
AUGUST

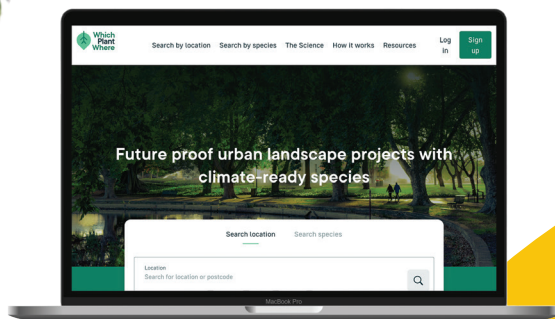

Welcome to this month's **Greener Spaces Better Places** program update. Read on to find out the latest news and highlights to keep you up to date on what's happening and how you can benefit.

NEW PLANT SELECTOR TOOL LAUNCHED TO PROMOTE CLIMATE READY URBAN GREENING

Local governments, landscape architects and urban greening professionals are now able to use a new tool to determine which plants will survive in Australian urban landscapes, not only now but under future climate scenarios.

The initiative is the culmination of five years of research delivered through Hort Innovation, and led by Macquarie and Western Sydney Universities, as part of the five-year research project Which Plant Where.

**GREENER
SPACES**
BETTER PLACES

We are a movement that brings together community, growers, government, business, and everyday people just like you to make our homes, streets and suburbs the greenest in the world. After all, every green space counts towards a greener Australia. And when everyone gets involved, together we can bring the power of plants into every life.

URBAN GREENERS' RESOURCE HUB

Australia's #1 collection of best practice tools, guides and resources for professionals. Made in partnership with [Living Melbourne](#). If you have a guide you would like to showcase, please [contact us](#).

URBAN GREENERS' RESOURCE HUB 2.0

Greener Spaces Better Places has once again teamed up with Living Melbourne to refresh the Urban Greeners' Resources Hub. This one-stop, curated collection of best practice tools, guides, resources and case studies helps urban greening professionals protect and enhance Australia's urban forests and green cover in our towns and cities.

The Urban Greeners' Resource Hub was developed in close consultation with technical experts across research, industry and local government, and we gratefully acknowledge their support and input.

Based on community feedback, we've evolved content and functionality, to bring urban greening professionals a new and improved Hub.

2022 TREND REPORT OUT SOON

Look out for the Greener Spaces Better Places trend report! It's the first one under the new brand (and the third as a continuation of the Plant Life Balance trend report series).

The report will focus on emerging trends, unpacked by industry experts across retail, growers, horticulturists, academics and landscape architects.

We'll be unpacking each trend in upcoming Horticulture Journal articles, to give you practical tips on how to bring these trends to life in-store and across your nursery communications, to excite and engage your customers.

WHAT'S NEXT?

Greener Spaces Better Places is developing an exciting consumer education campaign. This video series will feature experts from the nursery and garden industry all over Australia.

Do you have suggestions for industry talent to answer crowd-sourced horticulture questions? Please reach out to hello@greenerspacesbetterplaces.com.
